

I claim

1. A method for the growing of crops comprising applying dried distiller's grain and soluble to the soil in which the crops are to be grown.
2. The method of claim 1 wherein said crops comprise corn.
3. The method of claim 1 wherein said applying dried distiller's grain and soluble to the soil comprises tilling said dried distiller's grain and soluble into the soil prior to seeding of said crops.
4. The method of claim 1 wherein said applying dried distiller's grain and soluble to the soil comprises spreading said dried distiller's grain and soluble onto the top surface of the soil.
5. The method of claim 4 wherein between 1 and 200 tons of DDGS are spread on each acre of planting area.
6. The method of claim 3 wherein between 1 and 200 tons of DDGS are tilled into each acre of planting area.
7. A method comprising
processing corn, wherein said processing corn yields dried distiller's grain and soluble as a by-product, and

applying said dried distiller's grain and soluble to the soil in which corn is to be grown.

8. The method of claim 7 wherein said applying dried distiller's grain and soluble to the soil comprises spreading said dried distiller's grain and soluble onto the top surface of soil.

9. The method of claim 7 wherein said applying dried distiller's grain and soluble to the soil comprises tilling said dried distiller's grain and soluble into the soil prior to seeding.

10. The method of claim 7 further comprising growing corn in said soil.

11. A method for the growing of crops comprising applying a mixture of organic compost dried distiller's grain and soluble to the soil in which the crops are to be grown.

12. The method of claim 11 wherein said crops comprise corn.

13. The method of claim 11 wherein said applying a mixture of organic compost and dried distiller's grain and soluble to the soil comprises tilling said mixture of organic compost and dried distiller's grain and soluble into the soil prior to seeding of said crops.

14. The method of claim 11 wherein said applying a mixture of organic compost and dried distiller's grain and soluble to the soil comprises spreading said mixture of organic compost and dried distiller's grain and soluble onto the top surface of the soil.
15. The method of claim 1 further comprising planting corn into said soil.
16. The method of claim 1 further comprising transplanting a crop into said soil.
17. A method for the growing of crops comprising applying dried distiller's grain to the soil in which the crops are to be grown.
18. The method of claim 17 further comprising planting corn into said soil.
19. The method of claim 17 further comprising transplanting a crop into said soil.
